This is one of the most impressive inflatable available for kids today. You will see the excitement on the faces of the children and adults when they see this incredible creature for the first time. Kids climb up the Gator's teeth to the top of his mouth where they will push through the inflatable doors to go inside his belly. Once inside they find themselves at the top of a slide. The fun really begins when they plunge down the inflatable slide, go through the inflated pillars and then exit at his tail. There are windows on each side for parents to watch.
